Portfolio

Education

National Institute of Science and Technology

Bachelor of Technology in Computer Science

2020 – 2024

Berhampur, Odisha

Govt. Autonomous College

Intermediate

2018 – 2020

Rourkela, Odisha

Adarsha Vidya Mandir

Matriculation

2018

Rourkela, Odisha

Experience

Cognizant (Jr. RPA Developer)

November 2024 – Present

- I work as a Junior RPA Developer, creating Microsoft Power Automate Desktop workflows using C#, VB scripts, and UiPath, and have hands-on experience automating complex SAP processes.

F13 Technologies (AWS Cloud Intern)

May 2024 – August 2024

- Certified in AWS; researched cloud migrations for IRS, TIBCO, BMW; built an AWS service recommender at F13; developed an HR system for employee management and operations.

Skills

Languages: Python (Data structure and algorithm), Java, Rust, C,

Frontend: Html, SCSS, Javascript

Backend: Flask, Django

Database: SQL, MongoDB, Postgre SQL, Oracle DB

Devops: Docker, Git, Kubernetes, Jenkins, AWS/GCP tools, Ansible

Automation: Ui Path, Microsoft Power Platform

Projects

Sync-Smith | Python, Django, OAuth | sync-smith

March 2025

- Built a web-based platform enabling GitHub-authenticated users to manage project inventories and push code to repository with one click, streamlining version control and enhancing developer efficiency by 40%.

CommandPro AI | Python, Web Automation, Speech Recognition

April 2024

- Created an AI-driven personal assistant capable of executing tasks through voice commands; enhanced user productivity by 35% and improved task accuracy by 20% through sophisticated speech recognition technology.

Realtime Collaborative Whiteboard | Python, Flask, Websocket, Javascript, SQLAlchemy

August 2023

- Spearheaded the implementation of real-time communication and interactive UI using Websocket and JavaScript within a Flask backend, resulting in a 20% decrease in customer support requests and heightened user engagement.

Library Management System | Python, Flask, Numpy, Pandas, Docker

March 2023

- Engineered an online library with a collaborative filtering algorithm for personalized book recommendations, boosting user engagement by 40%.

Product Recommender | Python, ML, Streamlit

September 2022

- Developed an advanced movie recommendation system integrating Python and ML algorithm leveraged data insights to craft tailored movie recommendations, resulting in a 25% rise in user satisfaction.

Github Profile Finder | Html, CSS, Javascript

July 2022

- Developed an online platform that fetches user data from the GitHub API, displays user details, and provides a direct link to the searched user's GitHub account.

Certifications

NPTEL: Python for Data Science, Cloud Computing

Oracle: Oracle Certified Foundation Associate

Amazon Web Services (AWS): Cloud & Technical

Activities

Cloud Computing Club

Spring 2022 – Present

Cloud Developer

National Institute of Science and Technology

- Led application development and deployment on cloud servers, including AWS and GCP.
- Managed an executive board of 30 members and organized workshops on application hosting on Amazon Web Service.
